## EDUCATION

### UNIVERSITY OF BRITISH COLUMBIA | BSC IN MATHEMATICS AND COMPUTER SCIENCE

2014 - 2018 | Vancouver, BC

## VOLUNTEER & WORK

### KILLARNEY COMMUNITY CENTER | ACTIVITIES AND EVENTS ASSISTANT

December 2010 – June 2014 | Vancouver, BC

- Volunteered in helping the center run various sports programs and other activities primarily targeted toward youth
- Occasionally responsible for instructing small-sized group of teenagers in a sports program

### TUTOR

September 2013 – present

- Work with both secondary and post-secondary students
- Specialize in teaching mathematics and computer science (up to 3<sup>rd</sup> year university level)
- Experience in teaching general science (physics, chemistry) and language courses

### TEACHING ASSISTANCE | MATH TA AT UBC

2016 – 2017

- TA for a few 1<sup>st</sup> and 2<sup>nd</sup> year level math courses
- Responsible for assignment, midterm, and exam grading
- Held office hours to assist students in understanding course concepts

## PROJECTS

### MIND THE GAP | ANDROID APPLICATION FOR LONDON'S TRANSIT SYSTEM

July 2016 – August 2016 | Java

- Implemented a parser that transforms data from London's transit API
- Partially coded up the Android application that visually marks out transit lines or station locations on a map and provides information such as train schedules for different stations

### INSIGHTUBC | COURSE AND BUILDING EXPLORER FOR UBC

January 2017 – April 2017 | HTML • SCSS • Typescript

- Worked with another individual in designing and implementing a RESTful API that transforms raw UBC data into something more suitable for the end user
- Coded up server responsible for breaking down zip files, caching data, and acting as a rudimentary database for manipulating data using user provided queries
- Wrote up front end responsible for parsing input data into queries suitable for the back end

### GSMS | GROCERY STORE MANAGEMENT SYSTEM

January 2017 – April 2017 | HTML • SCSS • Typescript • SQL

- Worked with three others to implement a management system suitable for grocery managers to monitor store activities, inventory, and finances
- System consists of a RESTful API that parses user inputs into SQL statements, Oracle database that stores all the data, and a front end webpage that sends user inputs to the appropriate endpoints

## TECHNICAL SKILLS

Comfortable with:

Java • Typescript (Javascript) •  $\LaTeX$

Familiar with:

C • C++ • Python 3 • MATLAB • (PL)/SQL • PHP • Assembly • Visual Basic • HTML & SCSS (CSS)

I've used these before:

JUnit • Mocha • Node.js • React Native • Adobe Illustrator • Adobe Photoshop • JetBrains IDE • WordPad
